

6 February 1969

MEMORANDUM FOR: Information Processing Coordinators

SUBJECT : Data for Computer Application Registry

1. Attached is a semi-final effort at the Applications Register design. If there are major changes in the design and content, I'd like to have them by the 17 February meeting. If as I hope the design can be accommodated by minor alterations, I'd like to have those by 12 February and I will then try to field a final version of the design on the 17th.

2. I would suggest that we complete our first effort at implementation on this 60 days after we can get a final design of the questionnaire or data recording sheet printed and in your hands, and that we update the file semi annually in December and June, skipping June 1969 if we have initial file ready prior to that date.
